

Quickstart - DE4L Sensing App

diGuRaL Sensing App

- ▶ Google Play Store
- ▶ TODO LINK + QR CODE AND SCREENSHOT

AirBeam 2

- ▶ <https://www.habitatmap.org/airbeam>
- ▶ Bluetooth Classic
- ▶ PM1, PM2.5, PM10

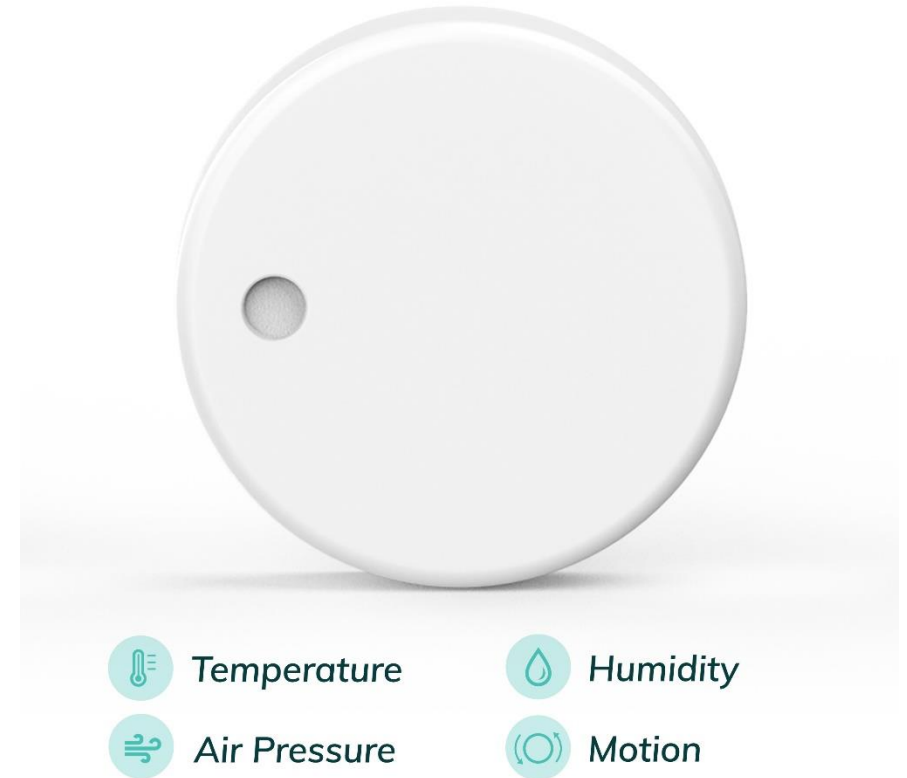

AirBeam 3

- ▶ <https://www.habitatmap.org/airbeam>
- ▶ Bluetooth LE
- ▶ PM1, PM2.5, PM10

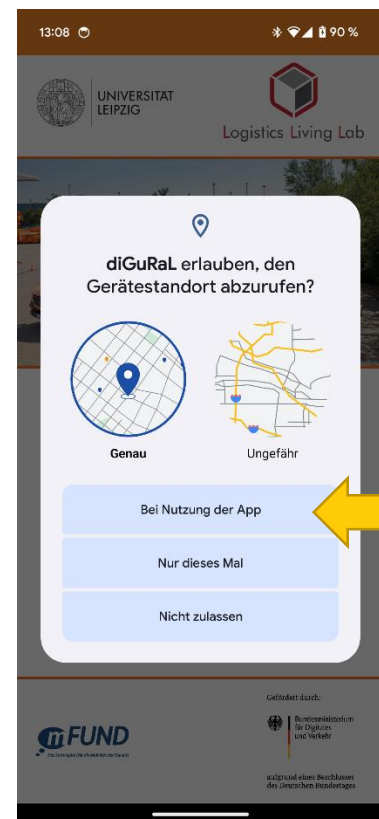

Ruuvi Tag

- ▶ <https://ruuvi.com/>
- ▶ BLE Beacon
- ▶ Temperature, Humidity, Air Pressure

App - Permissions - Location / Bluetooth

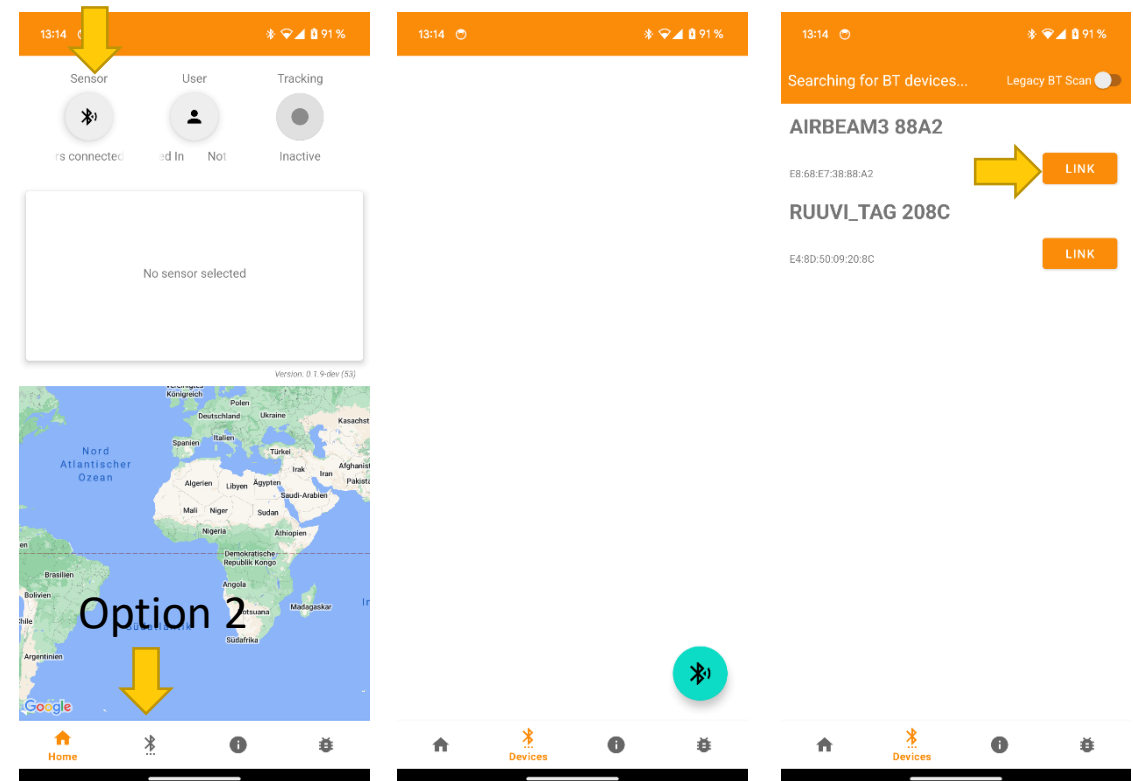

- ▶ App uses location services and within a foreground service when active - no hidden location tracking
 - ▶ Select “Allowed only while in use” when asked for permission
- ▶ App uses Bluetooth device discovery for sensor connection
 - ▶ Select “Allow” when asked for permission
- ▶ App needs to display a notification, so tracking is possible while app is in background
 - ▶ Select “Allow” when asked for permission

App - Link Sensor (only once)

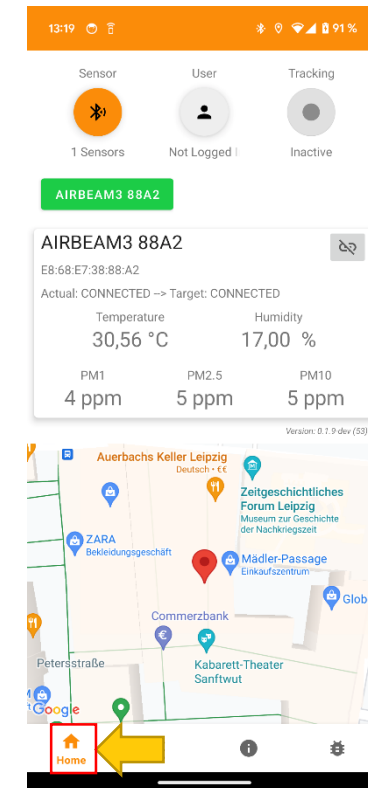

- ▶ Link Sensor sensor with app
- ▶ Default scan is for BLE devices only
- ▶ Enable Legacy Scan to scan for BT classic devices. **Currently only needed for AirBeam2**

Option 1

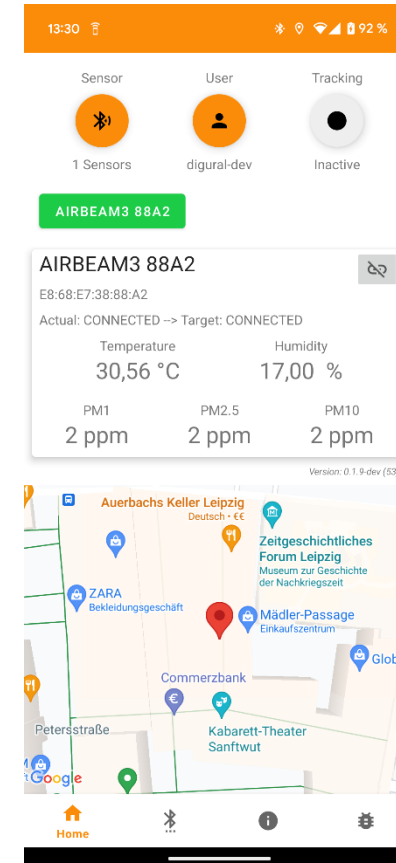

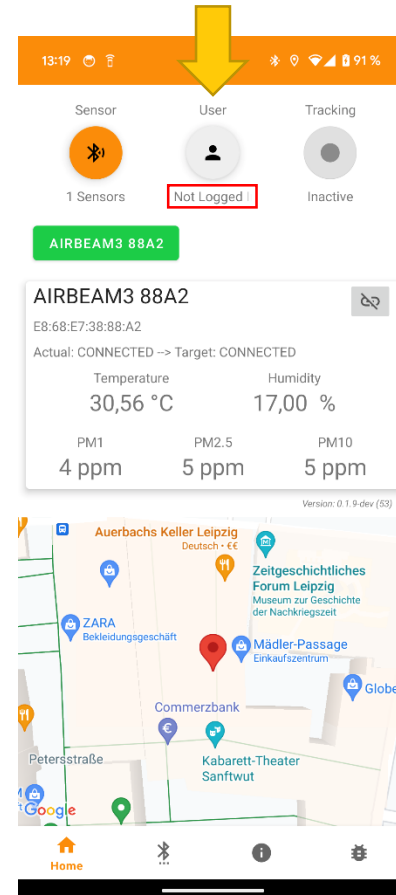

App - Connect Sensor

- ▶ Press „Connect“ in „Devices“ screen
- ▶ Connection process can last up to 60 seconds
- ▶ When the sensor is connected the first time, a pairing notification might be shown by Android
- ▶ On success, the app automatically switches to the „Home“ screen

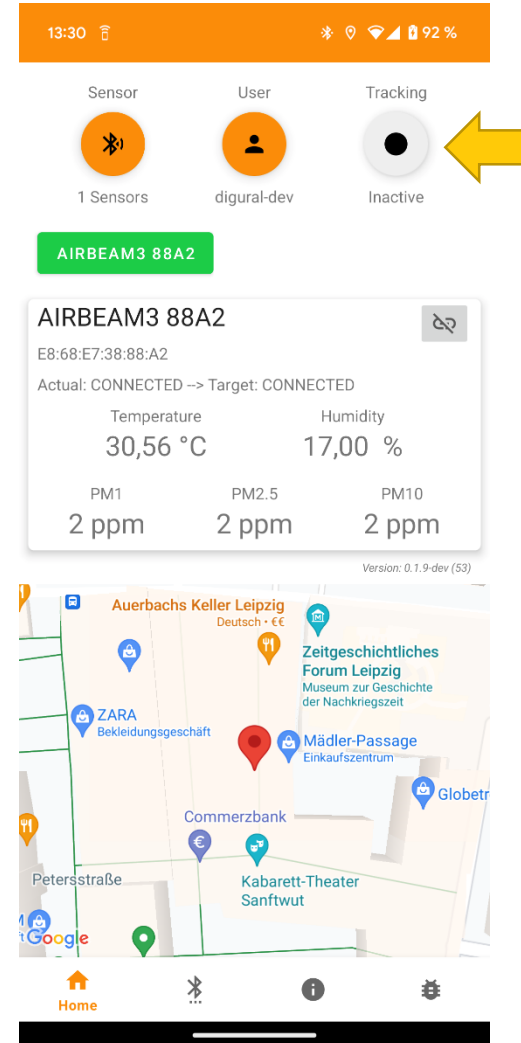

App - Login

- Use diGuRaL account to login

App - Start Tracking

- Tracking can only be started when at least one sensor is connected and a user logged in

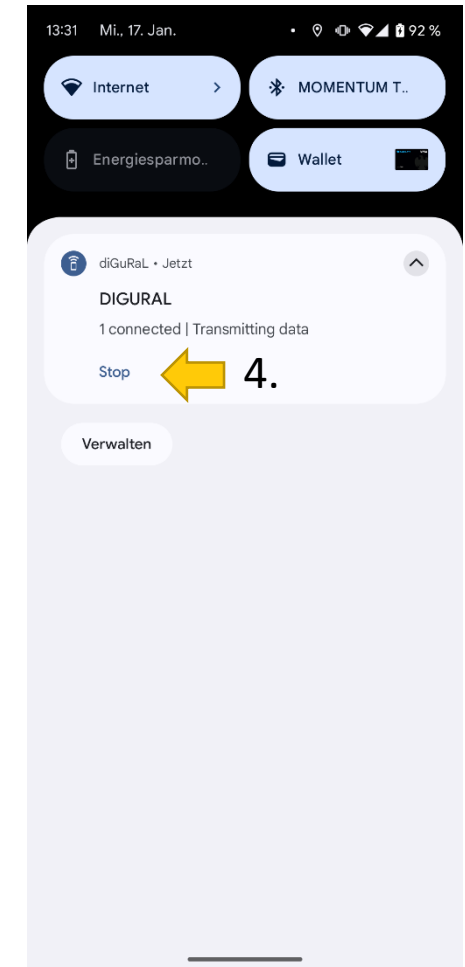

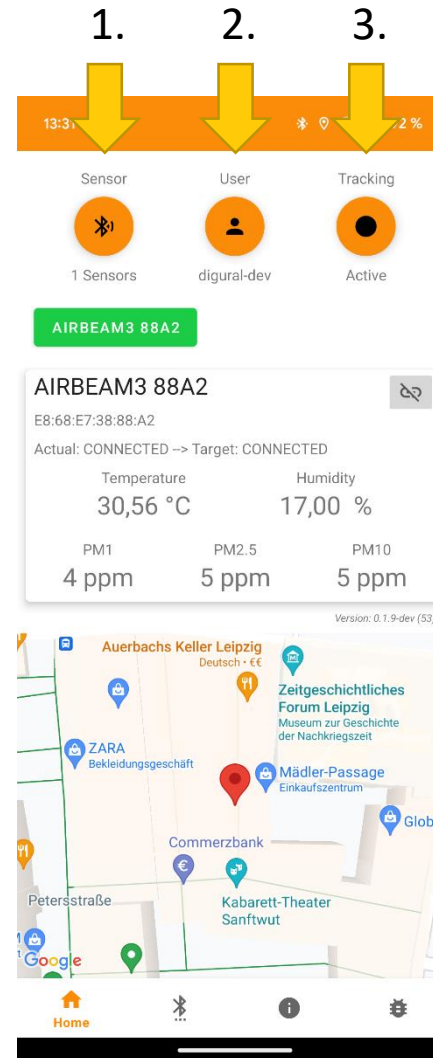

App - Start Tracking

- ▶ 1. Disconnect Sensor
(Data transmission and tracking is stopped automatically)
- ▶ 2. Log out
(Data transmission and tracking is stopped automatically)
- ▶ 3. Stop Tracking

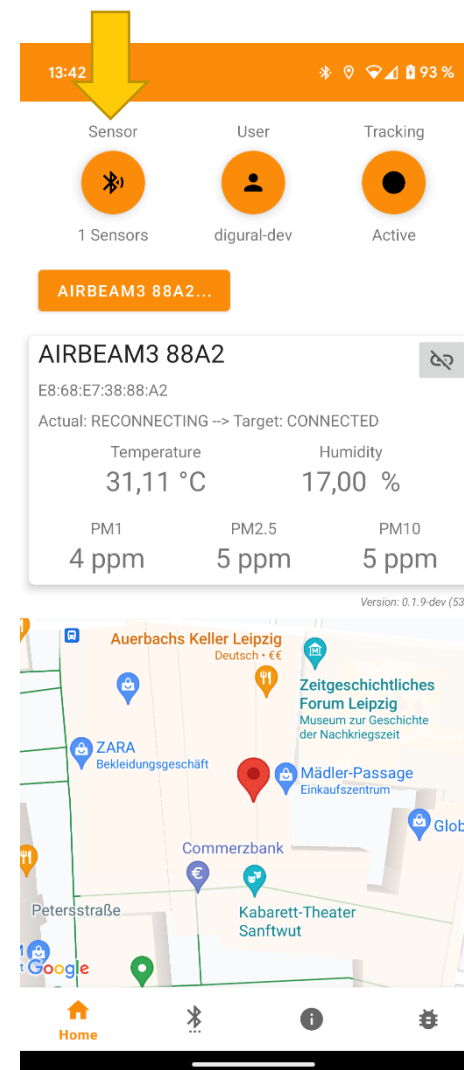

Notification in status bar

- ▶ 4. Stop Tracking and disconnect sensor

App - Features - Reconnect

- ▶ In case the connection to the sensor is lost unexpectedly, the app tries to reconnect
- ▶ To cancel the reconnect trials, press the sensor „button“

Data transmission

- ▶ The app transmits data to an MQTT Endpoint in real-time
- ▶ Transmitted data includes sensor measurements, timestamp, location, username and the current app version.
